

SCIENTIST / SENIOR SCIENTIST

About Tessellate

We are a pioneering and fast-growing international biotechnology company, focusing on targets to address cancers that depend on synthetic lethality (SL) mechanisms.

We are seeking to expand our innovative pipeline by exploiting additional targets for patient populations with unmet needs. Our Lab in Stevenage Bioscience Catalyst supports target validation and molecular pharmacology activities to grow the Tessellate business.

About the role

We are looking for a scientist/ senior scientist to work with us on a one-year fixed contract to:

- Support the development and execution of laboratory work plans within the Biology Group.
- Author and approve technical documents such as protocols, test methods, - test reports and operating procedures.
- Participate in laboratory meetings, providing timely reporting of data and plans to the wider team.
- Work collaboratively with partners to ensure the success of projects.
- Be part of the wider company, attending meetings and team events.

Other activities may also be needed.

About you

This position applies scientific excellence and technical knowledge to design, execute and analyse experiments. Your work will significantly contribute to the direction of the company.

You will bring knowledge of biological sciences with a strong cellular background. Proven understanding of cellular pathways is a must and you will have a strong background in cellular assays and models.

Your ideal skills and experience

- Ph.D or MSc in Biological Science
- Industrial experience desirable
- Experience in tissue culture techniques (essential) with knowledge of RNAi desirable.
- Ability to work in a start-up environment, independently and as part of a team
- Expert knowledge of biological pathways and signalling mechanisms.
- Hands on experience with biochemical and cell-based assays commonly used in oncology drug discovery, ideally with plate-based assays and/or high content imaging
- Knowledge of appropriate disease animal models is a plus
- Excellent written and verbal communication with ability to both present data clearly and accurately, as well as goals & tasks
- Strong organisation, planning and problem-solving skills
- Good relationship building and inclusiveness (in-person and virtual)

Tessellate offers rewarding opportunities

At Tessellate Bio it is important to us that you feel acknowledged for the work you do and that we support your well-being, our benefits are designed to do just that, alongside great team members and work environment.

As a and growing business, we are always open to your suggestions about what benefits we might replace/add in the future.

- 25 days holiday plus Public Holidays (plus discretionary closure over Christmas/New Year period)
- Competitive pension scheme
- Annual Bonus (target based)
- Private Medical Insurance (up to family cover)
- Life Cover (4 x annual base salary)
- Opportunity for flexible working
- Access to pay as you go gym at Stevenage Bioscience Catalyst Lab site

Tessellate Bio is inclusive and diverse, we are an equal opportunities employer. We are proud to be a place where everyone can grow, be themselves and support those around them.

However you identify, and whatever background you bring with you, please apply if this role excites you and you want to join us.

Please note that you must have the right to work in the UK to apply for this role.
